Saves up to \$50 on Annual Electricity Bills

Tripp Lite Introduces New ECO-UPS System with LCD Screen

Chicago, IL (March 15, 2011)—Tripp Lite, a world-leading manufacturer of power protection equipment, has added the ECO650LCD to its award-winning line of ECO-UPS systems. The ECO650LCD features an interactive LCD screen and innovative Green technology that helps conserve electricity without sacrificing power protection.

Key Features:

- Interactive LCD user interface displays detailed UPS data
- A savings of up to \$50 per year on energy costs
- 8 outlets, including 3 energy-saving ECO surge outlets that automatically turn off idle equipment
- USB port and included USB cable enable automatic unattended shutdown with free PowerAlert software (Web download)
- Ultra-compact flat-pack housing
- 99% power efficiency saves energy around the clock
- 100% RoHS compliance meets strict environmental standards
